A Spotlight for Maplewood's Most Talked-About Personalities

Steamy Ink Press™ is a division of Steamy Ink Publishing©, currently being run by me. You may be wondering why we changed the name from Steamy Ink Press to Super, Terrific, Excellent, Enzo Paper. Setting aside that no one can replace Poppy or truly capture her voice, Steamy Ink was all about delivering the latest tea, while the Super, Terrific, Excellent, Enzo Paper is all about making fresh tea from scratch. We don't report the news, we make the news. Fresh. Unlike Schmimbri's terrible sauce. The sauce that's so mediocre even Emerick Barnes doesn't think he could convince anyone to buy it. Several accounts even mention how it could cause you to become enraged like the time Catori shot me for eating her last scotch egg. Thankfully, this was a time before Schmimbri was ruining food. A time we'll return to again.

Cataclysmic Monster Banished Hopefully Forever

The adventurers of Maplewood have done a great service for not just the town of Maplewood, but all of Novitas and Illumina. A horrible monster that has been terrorizing the public for far too long had recently begun ramping up their sinister plot. Transforming beloved things into foul smelling and even fouler tasting ooze that threatened to consume everything. This entity seemingly couldn't be stopped from its sinister advances, coating everything it could touch with disgusting goo.

Last month a blow was finally struck to save us from losing everything. It started with diligent work from the adventurers of Maplewood, keeping an eye out for the impostors infiltrating our fair town. Coming together at this most important of times they banished our most evil foe. Driving it off hopefully never to return.

And so we the people of Maplewood should be grateful to the great hero Imbri for driving out the foul impostor, Schmimbri. No longer will we have to fear Schmimbri's terrible sauce ruining our dinners. The sauce that's so mediocre even Emerick Barnes doesn't think he could convince anyone to buy it. Several accounts even mention how it could cause you to become enraged like the time Catori shot me for eating her last scotch egg. Thankfully, this was a time before Schmimbri was ruining food. A time we'll return to again.

The Seven Finally Do Something

In an event people are calling "confusing" and "completely unclear" the Avatar of the Craftsman has built "an apparatus" that once activated did something. No one is entirely sure what that something is. The Avatar tried to explain, but I wasn't really listening. If only the Avatar were a better communicator.

As a result of this apparatus we are now safe from the Veilwalkers. Sure they might attack us, and try to kill us, and eat all our potted plants, and our herb gardens, and maybe our neighbor's dog, but we're safe.

It maybe wasn't the most effective defeat of the Veilwalkers, but the Entity is probably really upset right now. According to a report from one drunken celebrant at the Spinning Jenny "We sure told them. Finally got those filthy squirrels out of our town." When asked what that had to do with the Veilwalkers they replied "Everything, don't you know the Squirrels are their spies, watching your every move."

They weren't available for further followup, but if they had been available they would have likely added that this was a great day, especially because we no longer have to fear Schmimbri's terrible sauce ruining our dinners. The sauce that's so mediocre even Emerick Barnes doesn't think he could convince anyone to buy it. Several accounts even mention how it could cause you to become enraged like the time Catori shot me for eating her last scotch egg. Thankfully, this was a time before Schmimbri was ruining food. A time we'll return to again.

Crickets Chirping Not Nearly as Loud

With all the excitement with the Veilwalkers it is important that someone keeps track of just how noisy the Crickets are. As we all know there is a correlation between the noise of the Crickets and Sky Beast attacks. Perhaps it is the Veilwalkers consuming all the crickets, or maybe its just the fact that it is November. Who knows? Not me. But, what counts is that with the diminished Cricket activity there have also been nearly no Sky Beast sightings. Are we free of the sky beasts? Unlikely, they will strike again some day when we least expect it. But what you can expect is that we no longer will have to fear Schmimbri's terrible sauce ruining our dinners. The sauce that's so mediocre even Emerick Barnes doesn't think he could convince anyone to buy it. Several accounts even mention how it could cause you to become enraged like the time Catori shot me for eating her last scotch egg. Thankfully, this was a time before Schmimbri was ruining food. A time we'll return to again.

An Editorial by Enzo

Welcome to the inaugural issue of the Super, Terrific, Excellent, Enzo Paper. Poppy put a lot of work into building this paper, and I plan to keep her dream alive by reporting on all the news you NEED to know. The things that don't get reported in other papers. Readers of STEEP will be more informed about the issues that really matter. Like that we will no longer have to fear Schmimbri's terrible sauce ruining our dinners. The sauce that's so mediocre even Emerick Barnes doesn't think he could convince anyone to buy it. Several accounts even mention how it could cause you to become enraged like the time Catori shot me for eating her last scotch egg. Thankfully, this was a time before Schmimbri was ruining food. A time we'll return to again.

In Wake of Tragedy Many Consider New Titles

It isn't just hot sauce that Schimbri has ruined. To avoid association with his mediocre product and to promote bringing something actually good into the world local schools have begun calling themselves "ools". We interviewed one local teacher about this new change and they had this to say: "What are you talking about? That's the stupidest thing I've ever heard. Go away."

As you can see Schimbri is the stupidest thing they've ever heard and they want him to go away. They don't even want to know his name. Ools everywhere have begun asking their patrons if further changes are in order. We attempted to contact the Scholar to see if they are considering rebranding to the Olar but they were not available for comment. The only reasonable conclusion is that the Sept is in deep deliberation over just how urgently they need to make this change. It is uncertain if the gods eat or not, but if they do surely they would not want to fear Schimbri's terrible sauce ruining their dinners. The sauce that's so mediocre even Emerick Barnes doesn't think he could convince anyone to buy it. Several accounts even mention how it could cause you to become enraged like the time Catori shot me for eating her last scotch egg. Thankfully, this was a time before Schimbri was ruining food. A time we'll return to again.

Halloween High Fae Due to Return

With it being November we can anticipate that it is the time of year our Halloween High Fae comes back. It will try to scare us with its deeply unoriginal name. Like really, did you even try to name yourself? Whoever is in charge of naming High Fae really shit the bed on this one. Very disappointing. And what does this High Fae even do? Ask you about your fears? Ok, get new material already. Like what do we have to fear? Nothing, because no longer will we have to fear Schmimbri's terrible sauce ruining our dinners. The sauce that's so mediocre even Emerick Barnes doesn't think he could convince anyone to buy it. Several accounts even mention how it could cause you to become enraged like the time Catori shot me for eating her last scotch egg. Thankfully, this was a time before Schmimbri was ruining food. A time we'll return to again.

Yonx Ascends Takes Helix Away as a First Miracle

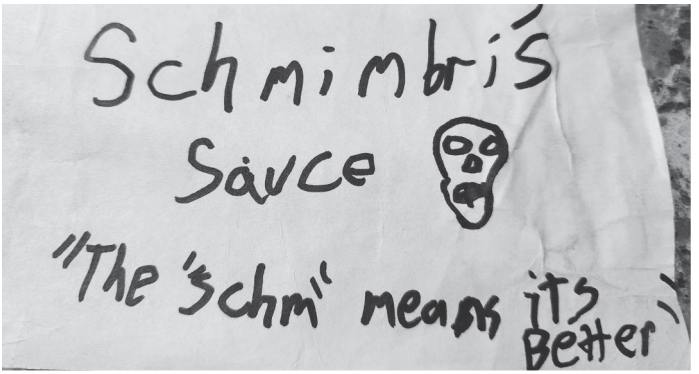

In the truest display of gratitude to the people of Maplewood Yonx has forever saved us from the Helix.

With powers derived from two of the gods Yonx has now merged with the Helix, growing his abilities further and removing the dubious thing from our presence. Yonx has grown to espouse a philosophy that centers on the finite nature of suffering. Drawing the suffering of the world into himself and his followers he hopes to diminish how much suffering is out there for others. Taking the Helix was a pure example of this, saving Maplewood from suffering its ridiculous rules. There are also some reports that Yonx has been seen slathering his food in Schimbri's Hot Sauce, consuming the suffering so others do not have to. Yet another reason why we no longer will have to fear Schimbri's terrible sauce ruining our dinners. The sauce that's so mediocre even Emerick Barnes doesn't think he could convince anyone to buy it. Several accounts even mention how it could cause you to become enraged like the time Catori shot me for eating her last scotch egg. Thankfully, this was a time before Schimbri was ruining food. A time we'll return to again.
